ABSTRACT OF THE DISCLOSURE

10 A method of playing a bingo-type game includes the steps of generating a result of
the game and displaying a representation of the result. More specifically, the representation
of the result of the game is displayed through a mechanical technological aid at an
electronic play station. An apparatus for playing the game includes a server and the
electronic play station in operative communication with the server. The server generates
the called numbers, which correlate to the result of the game, and the electronic play station
includes the mechanical technological aid for displaying the representation of the result of
the game. A program product for playing the game is stored on computer readable media
15 and includes a result program code for generating the result of the game and a display
program code for displaying the representation of the result through the mechanical
technological aid.
